

Please leave the Wisconsin No Call List "AS IS".

We have a right as consumers to make a decision to leave a business and do not need to be hounded by that business after we make that decision. I know the number of that business and where they are located if I am interested in returning to their services. After all, there must be a reason why I left/cancelled their services in the first place. Why should they be given a right to continue to "harrass" me? They can reach consumers like other businesses.....advertise.

After putting our number on the no call list, we have seen a remarkable reduction of those irritating dinner time phone calls and automated calls that go into your voice mail that are only half recorded. It has also kept my line open to work calls as I work from home.

Please keep the current Wisconsin No Call list "AS IS".  
Thank you.
